

Chapter 6:  
**The Industrial Revolution**  
 Why did it begin in England & What about Agriculture?

### Essential Ingredients for Industrialization

1. Labour Supply
2. Raw Materials
3. Stable Government that supported Business
4. Capital \$\$\$
5. Technology
6. Transportation

### The Enclosure Act...

Enclosure Movement  
 1760-1832

The movement when land started to be enclosed with fences, and wealthy landowners bought land from farmers who then moved to cities. Farming became a profitable business.

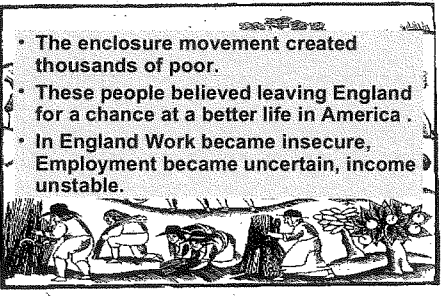

### Enclosure of Land...

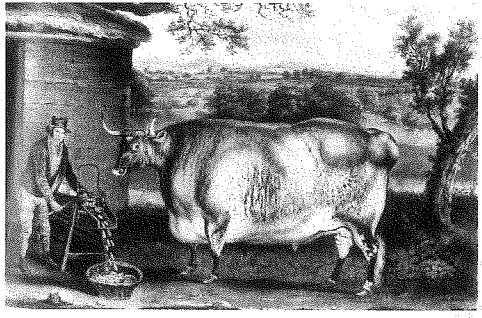

### Effect on the Poor Farmers...

#### Effect on Poor

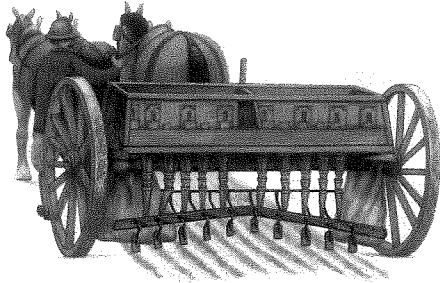

- The enclosure movement created thousands of poor.
- These people believed leaving England for a chance at a better life in America.
- In England Work became insecure, Employment became uncertain, income unstable.

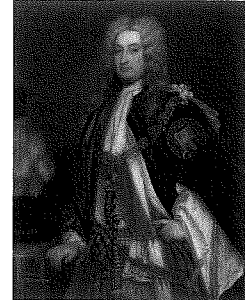

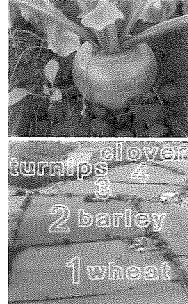

### New Breeds of Animals...

New Technologies...  
*Jethro Tull Seed Drill Machine*

Lord "Turnip" Townshend  
*New Crops & Year long Farming*

So where did the poor farmers  
go to find work?

- Into the cities to work in the Factories...
